Use the + button to send images, videos, audio messages, and attach documents

## Synchronize Your Schedules

If your team's schedule uses SportsPilot scheduling, you are in luck! Not only can you add all games and practices with a simple press of a button, but you will also get updated each time there is a change to your schedule!

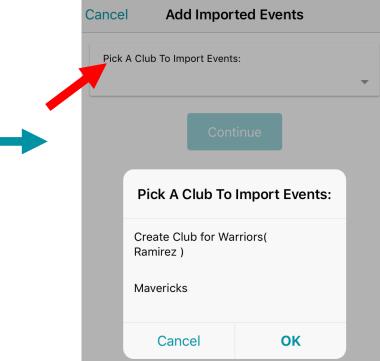

After having downloaded QuickClub and creating your team/club, go to your team's schedule on your league's website. Tap the "Add to QuickClub" button to sync your schedule.

If you already created your user account in QuickClub, your app should open, or you can select "Open with Schedule" on the landing page.

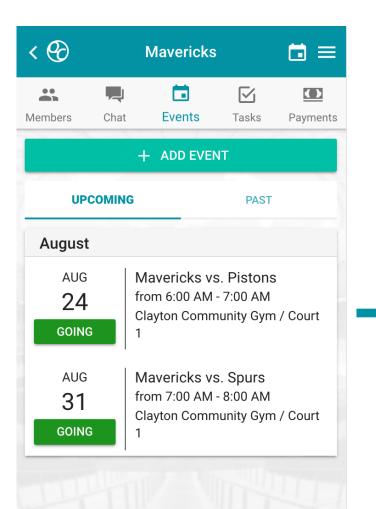

When the app opens it will load your schedule and give you an option for which club to import your schedule to, or to create a new club for the schedule. Once selected, click continue and go to the events tab of your club to see your team's events.

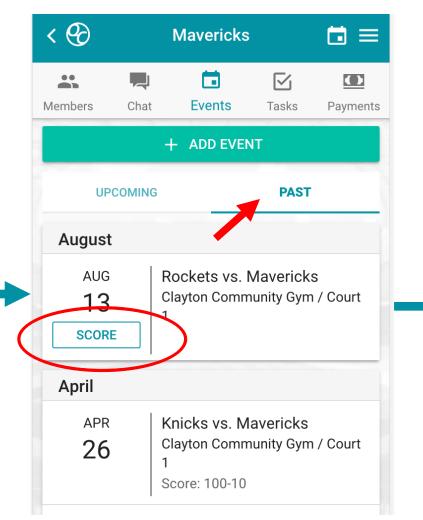

# Posting Scores

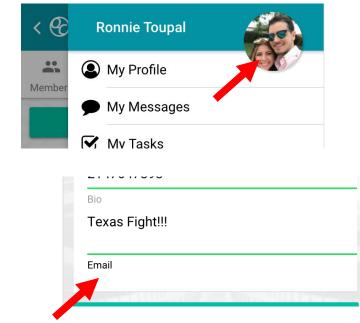

Go to the events tab to see your teams events.

Once an event has ended it will show up in the past events section and coaches should see a Score button tied to games with no score yet.

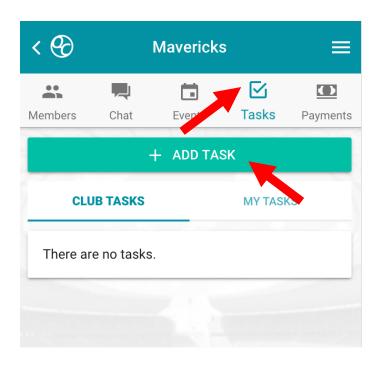

If you do not see the score button on a finished game, than your user does not have access to post scores or a score has already been posted. This could be because the email tied to your QuickClub account is not the email tied to a coach on the teams registration info. Go to your QuickClub Profile to update your email so that it is the same as the coach email that you registered with.

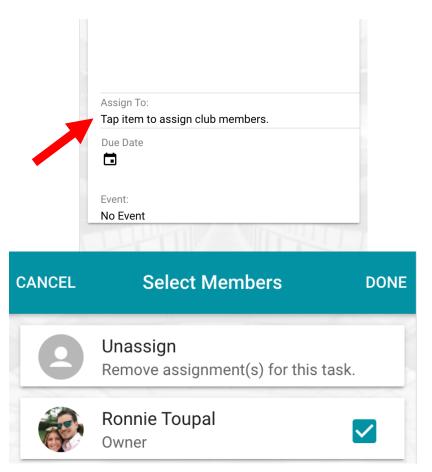

## Create Tasks for Team Members

Go to the tasks tab and click add task to create a new task.

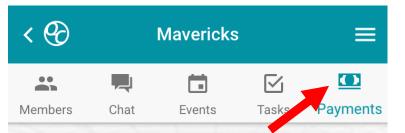

You can easily give the task a name, description and due date, as well as assign it to multiple members or link it to a game/practice

## Pay and Collect Money
